

Vertebrates and Invertebrates Shutterfold

Assembly instructions:

Cut out the rectangle. Fold along the solid line. Cut along the dotted lines. (To fit on the lapbook, this fold-it will need to be folded in half when completed.)

Teacher Directions: On the front students should define vertebrate animals and invertebrate animals. On the inside, list the classes that fit under vertebrate (Mammals, birds, reptiles, amphibians, fish) and invertebrate (arthropods, mollusks, echinoderms, annelids, cnidarians, porifera) Students can also list and draw examples of animals that fit under the category.
